

APPLICATION

- Clip, file and buff your nails.
- Gently push your cuticles back (never cut them).
- Apply the Gel Shine colour in three strokes, one down the middle and one either side of your nail.
- Stick to a maximum of two coats for a smooth finish.
- Apply the Top coat in the same pattern as the Gel Shine.

Enjoy your salon-worthy nails!

NATURAL CURING CLEAR TOP COAT

Our Gel Shine Top Coat uses a mix of traditional nail enamel and salon technology, which cures in natural UV light.

Ambient light helps bond and cure the nail polish in a similar way that a salon UV lamp finalises manicures.

Thanks to its hybrid technology, our gel shine system is 1 step ahead of traditional nail enamels and enhances the appearance and length of your gel-look.

The unique micro-bonding particles will provide the lasting colour, shine and intense plump look of a 7-day manicure.

HINTS AND TIPS

Roll your bottle of polish in your hands versus shaking it. Shaking creates air bubbles in the polish which transfer onto your nails leading to uneven application and chips more easily.

When filing nails do not use a sawing motion - use a fluid motion in 1 direction.

Don't moisturise over nails before application - this will prevent the polish from sticking to the nail and lead to a greasy finish.
